

Debt as a share of income in Israel is generally similar to the share in the eurozone.

Figure 10
Debt to Income Ratio^a by Income Decile, Israel and the Eurozone^b

^a The debt-to-income ratio is equal to the ratio of a household's total liabilities to total income.

^b Eurozone countries excluding Lithuania and plus Poland and Hungary. The data on European countries are for 2013–15. The data for Israel are for 2016.
